

EUNICE DOMINIQUE B. MOJICA

FULL STACK DEVELOPER, CYBERSECURITY

Santa Maria Bulacan 3022, Philippines
eunicedominiquemojica@gmail.com | 09663501316

Professional Summary

Full Stack Developer with hands-on experience in **frontend and backend development, database integration, system authentication, and UI/UX implementation**. Experienced in building and enhancing web applications using **ASP.NET Core, Blazor, React, C#, JavaScript, and TypeScript**, with practical experience connecting applications to **Microsoft SQL Server** and other database technologies. Skilled in developing **secure application features**, streamlining **business processes through automation**, and translating **UI/UX designs from Figma into functional interfaces**. Also experienced in **technical documentation, troubleshooting, and IoT development** using **Arduino and C++**. Familiar with a broad range of **programming languages, frameworks, databases, development tools, and platforms**, with a strong interest in building **reliable, user-focused, and efficient software solutions**.

Skills

Programming Languages: HTML, CSS, Python, JavaScript, TypeScript, C#, Java, C++, PHP, SQL, and Ruby.

Frameworks & Technologies: ASP.NET Core, REST API development, Blazor, React, Django, Laravel, and Node.js.

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Firebase, and Microsoft SQL Server.

Development Tools & Platforms: GitHub, Visual Studio, Visual Studio Code, Linux, Windows, Android Studio, Figma, Arduino, and Tinkercad.

Education

TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES - Manila **2022-2026**

Bachelor of Science in Information Technology (Specialization-Cybersecurity)

With Distinction

Capstone Project: Ka-GabAI: The Development of Intelligent Push cart for Shoppers

Awards: Dean's Lister 3rd year (1st sem) - 1.59, Dean's Lister 3rd year (2nd sem) - 1.72, Dean's Lister 4th year (1st sem) - 1.75, Dean's Lister 4th year (2nd sem) - 1.56, Meralco IDOL Hackathon (Top 9 Finalist) - October 13, 2023

MATER DEI ACADEMY - Sta. Maria, Bulacan

Graduation Date: May 4, 2022

Awards:

With High Honors

Internship Experience

PHILPLANS FIRST, INC. - Makati, Metro Manila

Software Developer Intern

January 2026 – April 2026

- Developed and maintained website features using Blazor Framework, ASP.NET Core, and C#, contributing to full-stack development tasks.
- Designed and enhanced user interfaces, resulting in improved usability and user satisfaction.
- Implemented backend functionalities and integrated front-end with server-side components to streamline application performance.
- Produced clear technical documentation for system features and workflows, facilitating easier onboarding and user understanding.
- Provided technical support by troubleshooting system issues and assisting users with software and hardware related concerns.
- Performed network security activities to protect systems from malware, including monitoring threats and applying basic security measures.

Projects

Generation of Notices — Internal Employee Web Application

Role: Full-Stack Developer | **Technologies:** ASP.NET Core, Microsoft SQL Server

Developed an internal web application under UAT to streamline the generation of employee notices and reduce the manual preparation of client documents. Implemented automated client information retrieval using Plan IDs and predefined document templates, allowing employees to generate either individual notices or multiple notices in batches. Integrated batch document generation with ZIP file packaging for efficient distribution and connected the application to Microsoft SQL Server for data retrieval.

Employee Login & Authentication System

Role: Full-Stack Developer | **Technologies:** ASP.NET Core, Microsoft SQL Server

Developed an employee authentication system using ASP.NET Core and Microsoft SQL Server to securely validate employee credentials. Implemented an account lockout mechanism that restricts access after three consecutive failed login attempts, providing an additional layer of protection against unauthorized access.

PhilPlans Pay Website Redesign

Role: UI/UX & Frontend Developer | **Technologies:** Figma, Blazor, Visual Studio

Redesigned and enhanced the PhilPlans Pay website to improve its overall user interface and user experience. Created and refined interface designs using Figma and implemented the redesigned UI using the Blazor framework in Visual Studio, focusing on usability, visual consistency, and a more modern web experience.

Ka-GabAI — The Development of Intelligent Push Cart for Shoppers

Role: Frontend Developer & Technical Documentation | **Technologies:** AI, IoT, Android Studio, Arduino, OpenCV(YOLO), Flask, Firebase, Gemini API

Developed the frontend and user experience of Ka-GabAI, an intelligent push cart designed to improve the grocery shopping experience through AI Nutri Guidance, In-Store Navigation, and Budget Tracker features. Worked on the system's user interface and interactive experience while documenting its technical processes, features, and development. The system integrates hardware components to support sensing, processing, and interactive functions within the smart cart.
